

Help your students with a HEADSTART Course in Year 12 (S5, NI Year 13)

Have you heard about our INSPIRE Courses for Year 11 (S4, NI Year 12) Girls?

We have some exciting opportunities for this year suitable for all students achieving A* to C grades. They should apply now for a place on one of our exciting Headstart or Inspire courses.

Last year we have supported and encouraged **2,700** students to make important Higher Education decisions. The Headstart scheme is part of EDT (the Engineering Development Trust), the largest provider of STEM (science, technology, engineering and maths) enrichment activities for UK youth. Students tell us they loved spending time at university and hearing from recent graduates, and we know that the Headstart experience gives them the edge when they fill in their UCAS application.

Your Year 12 (S5, NI Year 13) students should apply now for 2018 courses

Places will be snapped up, so your students should apply now for Headstart 2018 courses. There really is something to interest all your Technology, Maths and Science students – from broad-based engineering to maths, physics, chemistry and computer science. Here are the links for the [Headstart programme](#) and [Headstart flyer](#) for you – help us spread the word about these exciting opportunities at assemblies and through your VLE or newsletters to parents. Your students can find all they need to know and apply here: <http://www.headstartcourses.co.uk>.

Promoting Headstart to your students is easier, please show one of or both of our YouTube videos in your next assembly:

<http://bit.ly/HeadstartStudents>

Please ask your students to apply quickly as applications will close shortly.

Year 11 (S4, NI Year 12) students – Tell them about our Inspire Programme

Do your Year 11 students have a passion for STEM? Let us Inspire them at a three-day course at a leading UK university. Each Inspire course is a mixture of exciting hands-on activities, project work and personal development sessions. Anyone with an interest in creativity and problem solving can have a rewarding career in STEM. Find out more about Inspire and apply here: [Inspire courses](#). The [Inspire flyer](#) will give your Year 11 girls more details. Attending an Inspire course prioritises their application for Headstart the following year.
