

**Engineering the Future for Girls** is being delivered in collaboration with BP and BAM Nuttall and is designed to engage girls in a wide range of engineering challenges that will inspire them to become the next generation of engineers. The summer school is fully-funded by BP and BAM Nuttall and student costs, including a contribution towards travel, will be covered. Strathclyde will accept applications from girls with any range of subject choices at National 5.

The summer school is non-residential and therefore pupils should be able to make their way each day to the University of Strathclyde campus in the heart of Glasgow City Centre. Teachers are not required to accompany pupils during the week.

Pupils should apply at <http://www.strath.ac.uk/engineering/outreach/engineeringthefutureforgirls> using the online application form. The deadline for applications is **3 December 2017**. A confirmation email is sent upon receipt of application. The selection panel will meet in January to review the applications received and all applicants will be informed of the outcome of their application by 31 January 2018. An automated email is sent to teachers informing them of the application submitted and requesting a supporting statement. The supporting statement for each student should be submitted online using a designated link by **15 December 2017**, for the application to be considered.

If you would like any further information on the Summer School then please email: [engineeringthefutureforgirls@strath.ac.uk](mailto:engineeringthefutureforgirls@strath.ac.uk)
