

Design and Manufacture

Creativity is at the heart of this Course and its combination with technology makes it exciting and dynamic.

In S3 this is mainly a workshop activity

At N4/5 this is a mixed classroom and workshop subject

At Higher it is mainly in the classroom with some model making requirements.

Perth Grammar School

With Pride - We Respect - With Ambition - We Strive

Choosing Design and Make in S3

Learners will work through a variety of design tasks that will result in a final model. Learners will sketch designs, learn about how to design for people, create models using a variety of material and plan for making these objects.

Choosing Design and Manufacture in S4/5/6

The course encourages Learners to take a broad view of design and manufacture, through making decisions and taking responsibility for their own actions, generating and developing ideas, applying knowledge, and justifying decisions. These transferable skills place candidates in a strong position regardless of the career path they choose.
